

## GREENinMED Partners' Coordination Meeting

29<sup>th</sup> January 2020, Study Visit to Israel

Kinneret College, Sea of Galilee

Israel

## **GREENinMED partner meeting at Kinneret College**

**29<sup>th</sup> January 2020**

Sea of Galilee, the main potable water reservoir of Israel is in a very good condition this year, due to the rainy winter, that added more than 1.5 meters to the level of the lake with possible situation to have to open the dam to avoid flooding at the end of the winter. This was the optimal location to have the GREENinMED seasonal partner meeting at the beautiful campus of Kinneret College. The meeting was part of the Study Visit and the coordination meeting.

Picture 1- the GREENinMED partners

The main issues discussed at the meetig were as following:

1. Summary of the the transnational workshop of January 28
2. The near future GREENinMED program and activities and duties of the partners, focusing on the milestones to be achieved.
3. Clarification about the difference between the coaching sessions and the consultancy services- coaching will address groups of interested companies and consultancy will approach individual companies.

Next study visit, international workshop and steering committee will be organised on 22<sup>nd</sup> and 23<sup>rd</sup> April at CapEnergies premises (Aix-en-Provence, France).

10. Visit to Kinneret Innovation Center, meeting with the manager- Mr. Elad Shamir.

"The Kinneret Innovation Center is formed from a collaboration between the academy and the industry. Our goal is to create a new ecosystem of innovation in the fields of agriculture, water technology and technology. KIC aims to become an engine of growth to drive the economy by increasing the number of jobs and the salaries for the community in Northern Israel. For startups and companies, KIC offers tailored solutions that empowers them to achieve their goals".
