

MED-QUAD cross-border living lab on smart and efficient use of water

Academia, industry, civil society, and government cooperate for the development of the digital economy in the water and cultural heritage sectors, under MED-QUAD project funded by the European Union under the ENI CBC Med Program.

6
MED-QUAD

cross-border living labs concerning "smart water use and applications" in the participating countries Greece, Italy, Egypt, Jordan, Palestine, Tunisia.

The living lab is an open space accessible to the citizens where pilot projects regarding new products and services are tested, resulting from the fermentation process of the Quadruple Helix approach factors and serve the specific needs of citizens.

MED-QUAD consortium: 7 partners from 6 countries

"This document has been produced with the financial assistance of the European Union under the ENI CBC Mediterranean Sea Basin Programme. The contents of this document are the sole responsibility of EPIMORFOTIKI KILKIS Single-member LLC and can under no circumstances be regarded as reflecting the position of the European Union or the Programme management structures"

The pilot operation of the living lab for the SWUAP aims at the:

- analysis of the drinking water quality and the safety devices in water reserve tanks and networks
- traceability of water quality from the source to the households
- smart control devices and more efficient use of water by the citizens
- quality control of irrigation water
- traceability of vegetables "from field to shelf"
- smart packaging and safe use from the customers

Who will benefit?

- Universities
- Staff of city councils
- SMEs and business associations
- Regional and national authorities
- Policy-makers
- Entrepreneurs
- Society

Feel free to share and stay tuned for the next interesting actions of the living labs!
