# SME4SMARTCITIES

BEAIR

An innovative ecosystem of services for cities, fostering more sustainable habits to improve air quality. (Project pilot in Genoa, Italy)
COOL CITY

A learning experience kit for experimenting in the urban environment and a visualization of the data on a dynamic map of the city. (Project pilot in Israel)
INHERITAGE

Project that tackles the impact of climate change and pollution on the preservation of UNESCO heritage buildings. (Project pilot in Genoa, Italy).
PARK4DIS

Cross-sectional and interurban web-app platform that solves the parking problems for people with reduced mobility, ensuring their inclusion and autonomy. (Project pilot in the Region of Murcia, Spain)

QUICK

Sustainable mobility method for smart cities. (Project pilot in Málaga, Spain)
URBAN OASIS

A solar powered pergola that is driving a water turbine to create a pleasant, cool sitting area in the urban space. (Project pilot in Israel)

WAISENSE Safe/Efficient

Solution that aims at increasing water network efficiency and water quality in municipalities in the Jordan Valley. (Project pilot in the Jordan Valley).
