

# Introduction

The RESMYLE project aims to rethink the employment and social integration of young people in the Mediterranean through sustainable development.

3 areas of intervention have been chosen:

**AWARENESS-RAISING**

**TRAINING**

**ENTREPRENEURSHIP**

The first priority is to raise awareness on the environment and sustainable development, by and for young people.

To achieve this, RESMYLE first inventoried and developed educational resources to raise awareness on the environment and sustainable development. All these resources can be consulted and downloaded free of charge from the Act4urplanet.eu web portal.

RESMYLE was then able to launch a call for projects aimed at involving young people and raising their awareness on sustainable development.

## 11 PROJECTS

were selected across all the countries in which RESMYLE operates: **France, Italy, Jordan, Lebanon and Tunisia**, for a total amount of around **€80,000**

The 11 projects involved

## 340 YOUNG PEOPLE

**including 161 women and 179 men, and raised awareness among around 10 000 people.**

In this document, you can discover the projects one by one.

# Protect Lérins islands, a MARvelous experience

## ORGANISATION

CPIE ILES DE LÉRINS ET PAYS D'AZUR

## OBJECTIVES

MOBILISING YOUNG PEOPLE TO RAISE  
ENVIRONMENTAL AWARENESS AMONG MASS PUBLIC

## Results

- Capacity building on marine issues, regulation of uses and sustainable development
- Learn on project management
- Discover animation methods
- Discover the actors of the territory
- Learn how to overcome one's reticence and interact with the public
- Discover different environmental professions

## Activities

- Preparation of the campaign, communication materials, quizzes ([timeforaction.carrd.co](http://timeforaction.carrd.co)) and training
- Face-to-face awareness-raising actions with the public in the port of Cannes, at the Méditerranoscope, at the beach of the underwater museum (Iles de Lérins) on biodiversity, waste management, posidonia, fishing, shipping and noise pollution
- Audio recordings and interviews to produce a podcast

### طرق ابتكارية في اعادة تدوير الملابس Innovative ways to recycle clothes

الكثير منا لديه ملابس قديمة او تلفه لا يستخدمها ويسبب اتلافها اضرار بيئية كبيرة حيث تعد الملابس اخطر ملوث في العالم في مشورتنا هذا سنقوم بتحويل هذه الملابس الى افكار قابلة للتطبيق تساعدنا على ايجاد مصدر دخل اخر للأسر.

Many of us have old or damaged clothes that we do not use, and their damage causes great environmental damage, as clothes are the biggest polluter in the world. In our project, we will transform these clothes into viable ideas that will help us find another source of income for families.

### المسلم عليكم وأسعد الله أوقاتكم Hello - have a good time

سنعرض لكم في هذا الفيديو كيف نعيد تدوير البلاستيك والبولسترين اللذين يعتبران المصدر الأول للتلوث البيئي وهذه المواد يمكن تحويلها من ملوث سريخ الى منتج جميل جدا ونحوها الى مشاريع تستفيد منها لئلا نغيبا اربابنا وندخلنا دائما سنشرح ذلك خطوة بخطوة، خذوا حيلكموا معنا

We'll show you in this video How we can recycle polystyrene and plastic. The biggest source of the pollution, these materials we can turn from a very bad view into a very beautiful view and turn it into a profitable, permanent source of income. We'll explain step by step. Stay with us.

### فكرة عمل شلال من البلاستيك The idea of making a plastic waterfall:

RESMYLE

### الفكرة الأولى : First idea

قمنا بتحويل بطنال جينز قديم الى حقيبة يد.

We turned old jeans into a Handbag.

RESMYLE

### الخطوات : The Steps

# Eduquer pour un développement durable et encourager les métiers verts

## ORGANISATION

ASSOCIATION DES HABITANTS D'EL MOUROUJ 2

## OBJECTIVES

INCREASING AWARENESS ON SUSTAINABLE DEVELOPMENT ISSUES AMONG THE YOUTH

## Results

- Capacity building on green spaces management, cuttings, gardening, waste sorting, water management and irrigation
- Increasing awareness on sustainable development issues and Sustainable Development Goals among the youth
- Capacity building on a humid ecosystem to preserve

## Activities

- Training of young Neets volunteers with the Tunis municipal green spaces department.
- Workshop to introduce needs to cuttings
- Development of an educational garden
- Construction of a 15 m deep well, including 4 m of water within a highschool
- Installation of the rainwater harvesting and irrigation system
- Environmental education session on the Lake Sijoumi ecosystem
