

Get Creative!

Learn how you can create your own story for the urban area.

- 1.** Select 5 to 8 out of the 10 issues you find interesting and would like to focus on during the game.
- 2.** After choosing the issues you are going to work with take a look at the categories correspondently to each issue. Pick one per issue that you would like to focus on. This step will help you give detail to your story.
- 3.** Describe each issue in a more detailed way. Think about the following questions:
 - How is that issue creating conflict in the urban area?
 - Who is involved in the issue? Who is creating the problem? Who is being affected?
 - How is the issue affecting the daily routines and quality of life of the residents?
 - Why is it important for the sustainable development of the urban area to assess this problem?
- 4.** Finish the story by inviting the gameplayers to be a part of the decision-making gathering and have fun!
