

AMERICAN UNIVERSITY OF BEIRUT
FACULTY OF AGRICULTURAL & FOOD SCIENCES

ENVIRONMENT AND SUSTAINABLE DEVELOPMENT UNIT

Mediterranean Dialogue for Waste Management Governance (MED4WASTE)

Date of Release: 10-07-2023

Deadline of offers: 25-07-2023

IT specialist

SPAIN | JORDAN | LEBANON | ITALY | TUNISIA | GREECE

1. Background

The Environment & Sustainable Development Unit (ESDU) at AUB is an inter-disciplinary research and development center specialized in rural community development, local food systems and sustainable agriculture hosted at the Faculty of Agricultural and Food Sciences (FAFS) of the American University of Beirut. For more than 20 years, ESDU has been promoting through large community development projects sustainable rural livelihoods all over Lebanon. The Unit focuses on participatory development and capacity building through knowledge management and sharing, appropriate technologies, and impact analysis with particular attention to smallholder farmers, women and youth in the rural areas.

ESDU is currently working on the Med4Waste project. It is a project under ENI CBC MED aiming to facilitate new governance models for integrated and efficient urban waste management policies across the Mediterranean, with particular emphasis on organic waste & circular economy through adapting waste management plans, policies and other management actions and regulatory drivers in the selected territories.

The target audience for the Med4Waste awareness-raising activities is varied, and covers mainly the countries of Spain, Greece, Italy, Tunisia, Jordan, and Lebanon, along with the other UFM countries.

While considering that a collaborative effort towards waste management can send a clear message to community members on the importance of preserving the environment, sensitization meetings will be conducted to educate them on the consequences of waste. Communities will, therefore, be encouraged to act towards a zero-waste environment.

A mapping of stakeholders was done under the project. ESDU is willing to disseminate this mapping online and make it available.

2. Scope of Work

2.1. Role and Responsibilities

The Environment and Sustainable Development Unit (ESDU) at AUB is seeking the services of an IT specialist.

The consultant will provide all necessary activities similar but not limited to the ones mentioned below:

- Create an application for stakeholder mapping
- Link ESDU's stakeholder mapping database to this application
- Create an e-learning section on one of ESDU's platforms

Period: August 2023 (1 month)

2.2. Qualifications & Requirements

- Bachelor's degree in computer sciences, software engineering, information technology or any related field
- • Minimum five years of relevant professional working experience in the IT field
- • Good knowledge of IT and computer hardware and software
- • Good analytical, planning, organizational, and communication skills

2.3. How to apply

- Deadline to submit CV: July 25, 2023
- Interested candidates should send their CV to: esdu@aub.edu.lb
