YEP MED COURSE – OT 0

INTRODUCTION TO INTERNATIONAL TRADE OPERATIONS

7 – 14 November 2021

‘THE YEP MED PROJECT’

“The digitalization, environmental and sustainability aspects are currently a priority for all ports and port logistics communities. Operations are also analysed from the point of view of their impact. New generations must understand the impact of their decisions on the environment and must design sustainable logistics chains.”

– Eduard Rodés, Director of the Escola Europea – Intermodal Transport

The YEP MED Project

The project "Youth Employment in the Ports of the Mediterranean" (YEP MED in short), co-financed by the European Neighbourhood Instrument (ENI) Cross-Border Cooperation (CBC) Mediterranean Sea Basin (MED) Programme and led by the Escola Europea – Intermodal Transport (Spain), aims to develop port-logistics training and vocational (TVET) resources adapted to sector needs to strengthen youth employability; increase and upgrade local employment opportunities through the creation of real dual-learning programmes with job placements, strengthening the role of SME's operating in the port ecosystems for future employment creation; and setting up collaborative national and transnational partnerships between port-logistics associations, operators, SMEs, training centres and VET providers, whilst introducing a public-private partnership (PPP) co-management process.
