1. Introduction: purpose of the call for capitalisation projects

For the first time ever since its launch in 2007, the ENI CBC “Mediterranean Sea Basin” Programme has decided to use the tool of capitalisation through a dedicated and experimental call, adapted to the features of the Programme.

The capitalisation call, which main elements are illustrated in this document, answers the need to enhance and make further use of the consolidated results of a selected number of successful projects implemented in the cooperation area during the 2007-2013 ENPI CBC Med Programme: these projects have a direct and strong links with the strategic priorities addressed by the 2014-2020 ENI CBC Med Programme.

Notwithstanding the current limited level of implementation of the 41 projects funded by the ENI CBC Med Programme, this call has also the ambition to highlight promising outputs which bear a significant potential in terms of impact and efficiency.

The capitalisation call represents a tangible tool to build effective synergies with other initiatives – as mentioned in this document – with a view to positioning the ENI CBC Med Programme as an operational and open platform of governance to share experiences, knowledge, good practices and structure new multilevel networks of stakeholders across the Mediterranean area. In this regard, the call is the first step of a process that will be further reinforced during the programming period 2021-2027.

Having considered the experimental and innovative nature of the call, as well as its limited budget, the Programme will also carry out specific capitalisation activities through initiatives supported by technical assistance funds.

2. Scope of the document

This document is meant to support the preparation of proposals under the call for capitalisation projects, coherently with the expectations of the participating countries, as detailed below in terms of:

- Use of the results of the past **2007-2013 ENPI CBC Med projects** suitable for capitalisation described in the report “[Acting together for the Mediterranean](#)”. Key results, lessons learnt and highlights for decision-makers are expected to be duly considered by project proposals;
- Links with the key expected achievements of the ongoing **ENI CBC Med standard projects** - available in the dedicated section of the [Programme website](#) and in the publication “Cooperating for a more competitive, innovative, inclusive and sustainable Mediterranean”- to be considered by the Applicants as promising outcomes to be further exploited and disseminated;
- Connections with relevant projects labelled by the **Union for the Mediterranean**, with which capitalisation proposals should build upon the available knowledge/networks to increase the magnitude and impact of the operations to be funded;
- Synergies primarily with projects funded by the **Interreg MED Programme** and other **Interreg** and **ENI CBC programmes implemented in the Mediterranean area**;
- Reference to projects, actions, knowledge and expertise developed under the **WestMED** and **BlueMed** initiatives, the **PRIMA programme**, supported by **international donors** or by the **EU** under the **regional and bilateral components of the European Neighbourhood Policy**.

These Terms of Reference (ToRs) shall be read together with chapter 2.4 “Programme Priorities, Expected Results and Relevant Indicators” of the Joint Operational Programme which contains the logical framework to be addressed by Applicants under each Priority in terms of expected results and result/output indicators. Finally, Applicants shall pay attention to Annex II of the Joint Operational Programme, namely the “Indicative evaluation and monitoring plan”, which contains the full set of result and output indicators and their target values to be considered when writing a project proposal.

3. Thematic objectives and priorities addressed by the call

Based on the decision of the Joint Monitoring Committee, the following 4 Programme Thematic Objectives and the associated 11 Priorities are covered by the call for capitalisation projects:

Thematic objective A.1 - Business and SMEs development, including the following priorities

- A.1.1 Support innovative start-up and recently established enterprises, with a particular focus on young and women entrepreneurs
- A.1.2 Strengthen and support euro-Mediterranean networks, clusters, consortia and value-chains
- A.1.3 Encourage sustainable tourism initiatives and actions

Thematic objective A.2 - Innovation and technological transfer, including the following priorities

- A.2.1 Support technological transfer and commercialisation of research results
- A.2.2 Support SMEs in accessing research and innovation, also through clustering

Thematic objective A.3 - Social inclusion and fight against poverty, including the following priorities

- A.3.1 Provide young people, especially those belonging to the NEETS, and women, with marketable skills
- A.3.2 Support social and solidarity economic actors

Thematic objective B.4 - Environmental protection, adaption to mitigation of climate change, including the following priorities

- B.4.1 Support sustainable initiatives targeting innovative and technological solutions to increase water efficiency and encourage use of non-conventional water supply
- B.4.2 Reduce municipal waste generation, promote source-separated collection and its optimal exploitation, in particular its organic component
- B.4.3 Support cost-effective and innovative energy rehabilitations relevant to building types and climatic zones, with a focus on public buildings
- B.4.4 Incorporate the Ecosystem-Based management approach to Integrated Coastal Zone Management into local development planning

A proposal shall refer only to one Thematic Objective and one Priority.

4. What is capitalisation? A methodological approach

Although there is no agreed and unified definition among the community of ENI CBC and Interreg programmes of what capitalisation is, the dedicated INTERACT guide “[Capitalisation approaches and practices](#)” (December 2017) offers an overview of the main capitalisation approaches and practices in the

Interreg context over the 2007-2013 and 2014-2020 programming periods. It is recommended to Applicants to consult the aforementioned guide.

Based on the different definitions contained in the INTERACT guide, the concept of capitalisation could be reflected as the process that allows to enable the uptake of the results of a series of different projects by identifying successful and efficient practices, ensuring their promotion and dissemination with concerned stakeholders and fostering as much as possible the replication, reuse and mainstreaming in public policies level of the identified good practices at different levels (local, regional, national and Euro-Mediterranean, as the case may be).

In the context of this call for proposals, capitalisation projects are expected to capture the most promising short-term results (outputs¹) and long-term results (outcomes²) of the projects and initiatives identified in the ToRs and contribute to one or more (option recommended) of the following objectives:

1. Transfer and exploitation of results

- Developing innovative approaches/methodologies which combine the knowledge, experience and results of the projects identified in the ToRs and reinforce their impact, reach and magnitude;
- Promoting the re-use and/or transfer of the knowledge and results produced by the projects, extending their impact and geographical scope, as well as encouraging their replicability.

2. Reinforcement of networks

- Building new and reinforcing existing networks/clusters at national and regional level which associate the organisations coming from the different initiatives as described the ToRs in order to reinforce cross-border and cross-sector cooperation;
- Reaching and involving new target groups/type of stakeholders.

3. Strategic dissemination and awareness of public authorities and policy-makers

- Making the knowledge and results generated by projects more accessible, in accordance with the national authorities regulations, thus turning data into knowledge;
- Raising awareness and improving communication of results with key sector stakeholders (considering different types of expertise - academic, technical, regulatory, policy, etc. - and geographic levels – including local, regional and national and Euro-Mediterranean scale, as the case may be);
- Supporting policy-oriented innovations and development by fostering the mainstreaming of good practices into local, regional, national and Euro-Mediterranean public policies, as the case may be.

¹ Outputs are new products and services that result from the activities of a project. Outputs directly contribute to the achievement of the project results..

² Outcomes refer to the knowledge transferred and/or the changes that occur as a result of a project. Outcomes tend to be more immediate than most forms of impact.

In the application form, Applicants shall describe the methodology they intend to implement for capitalisation projects, focusing on the aims listed above. Examples of **possible capitalisation actions** include:

1. Transfer and exploitation of results

- Identification, analysis and benchmark of successful experiences and good practices achieved under different projects, programmes and initiatives in a specific sector of intervention
e.g. a study is carried out to identify and analyse the most successful support systems to the creation and development of start-ups
- Development of new tools, methods and approaches
e.g. based on the example above, a project will combine already successfully achieved actions in support to the creation and scale-up of start-ups and develop a new program which has the potential to turn ideas into actual businesses
- Replication and further development of successful and innovative solutions in new or wider territories/economic sectors
e.g. a project has successfully implemented energy retrofitting solutions in the public housing sector in Egypt, Jordan and Italy and will now replicate these solutions in other Programme eligible countries
- Marketing and commercial exploitation of products
e.g. a project has developed a catalogue of eco-sustainable touristic destinations and will further promote and market these destinations with international tour operators and during tourism fairs

2. Reinforcement of networks

- Clustering of projects having produced synergies in terms of results
e.g. projects in the same sector – for instance sustainable tourism – but funded or supported under different frameworks decide to join forces, pool expertise and implement common actions to further develop and reinforce the results already achieved
- Engagement of new stakeholders, communities or economic groups
e.g. a promising technology has been developed to extract valuable and beneficial substances from grape waste (including cosmetics, food supplements, etc.) and transferred it to a selected number of SMEs for commercial exploitation. Through a capitalisation project, the same methodology will be applied to other agrofood sectors, such as olive production, and transferred to a larger number of SMEs

3. Strategic dissemination and awareness of public authorities and policy-makers

- Creation of dissemination platforms where knowledge and resources pooling results and good practices of different projects/initiatives are available
e.g. an online database is created to showcase the results and good practices developed by projects working in a same sector, for instance waste management. Such database should help concerned stakeholders - local administrations, citizens, policy-makers - find useful and valuable knowledge to improve policies and behaviours for sustainable waste management

- Strategic awareness and capacity-building campaigns to showcase results and good practices with different type of target groups and stakeholders
e.g. available knowledge and successful achievements should be shared on a wide scale and reach actors who have not been directly involved in the projects in order to promote learning processes. Dissemination can be implemented through publications, studies, events, training modules, online courses according to the specific needs of the different types of stakeholders identified
- Support to evidence-based policy development and policy making and mainstream of results achieved
e.g. drafting of legal recommendations or policy papers/briefs, based on the upstream of existing results, successful experiences and good practices, should support the development of new policies, regulations or strategies, action plans or their amendment/improvement, especially at local level.

Considering the current context marked by COVID-19 pandemic and in view of the global economic downturn, applicants are encouraged to support the development of new intervention models that can foster the socio-economic regeneration across the cooperation area. In particular, project proposals should integrate innovative actions which focus on:

- The creation of jobs, businesses, startups, social enterprises;
- The transition to carbon-neutral economies in order to maximise the creation of green jobs, businesses and investments;
- The efficient delivery of social care services making most use of technology transfer, innovation and research in the fields of ICT;
- The support to the most vulnerable people, including youth, disabled, unemployed and elderly dependent.

5. Selected projects for capitalisation

When developing a proposal, Applicants shall consider the list of projects included below. The list, structured on the basis of the Programme thematic objectives and priorities, includes a selection of projects suitable for capitalization:

- Projects funded under the 2007-2013 [ENPI CBC Med Programme](#) (see annex 1);
- Projects funded under the 2014-2020 [ENI CBC Med Programme](#) (see annex 2);
- Projects labelled by the [Union for the Mediterranean](#) (see annex 3);
- Projects funded under the 2014-2020 [Interreg Med Programme](#) (see annex 4).

As far as the projects of the Union for the Mediterranean and Interreg MED Programme are concerned, these latest have been selected following a consultation with the management structures of both initiatives. Depending on the level of implementation of the selected projects - closed or ongoing - and the information available, a selection of potential outputs and outcomes for capitalisation is reported.

In addition, in order to broaden the scope of the capitalisation call, Applicants are invited to consider the results, knowledge and experiences developed by the following programmes and initiatives:

- **Interreg programmes** implemented in the Mediterranean area. Interreg is one of the key instruments of the European Union supporting cooperation across borders through project funding. It aims to jointly tackle common challenges and find shared solutions in fields such as health, environment, research, education, transport, sustainable energy and more. Interreg has three types of programmes: Cross border (60 programmes); Transnational (15 programmes); Interregional (4 programmes) with some of them implemented in the Mediterranean area. For more information about Interreg programmes and list of those with a Mediterranean coverage, please visit the [Interreg website](#) and [KEEP database](#).
- **ENI CBC Italy-Tunisia programme:** besides the ENI CBC Med Programme, Italy-Tunisia is the other “cross-border cooperation” funded by the “European Neighbourhood Instrument” (ENI) in the Mediterranean area. Italy-Tunisia programme, managed by the Region of Sicily, aims to foster cooperation and joint initiatives in the fields of SMEs development, innovation and research, and environment. Core eligible areas are the Sicilian provinces of Agrigento, Trapani, Caltanissetta, Ragusa and Siracusa, as well the Tunisian governorates of Bizerte, Ariana, Tunis, Ben Arous, Nabeul, Sousse, Monastir, Mahdia and Sfax. The list of the projects funded under the first call for proposals is available [here](#). For more information, please visit the programme [website](#).
- **WestMED initiative:** WestMED is a shared initiative between EU and partner countries. It supports projects that foster the sustainable development of the blue economy in the Western Mediterranean sea basin. Countries involved are Algeria, France, Italy, Libya, Malta, Mauritania, Morocco, Portugal, Spain and Tunisia. The [Communication from the European Commission COM\(2017\) 183](#) and related [Framework for Action SWD\(2017\) 130 final](#) lays out the steps to achieve the initiative’s goals and priorities. Following the meeting of the Ministers of the countries participating in the initiative for the sustainable development of the blue economy in the Western Mediterranean held in Algiers on the 4th December 2018, six priorities were identified in a [common declaration](#): 1. Maritime cluster development; 2. Biodiversity and marine habitat conservation and restoration; 3. Sustainable consumption and production; 4. The development of coastal communities and sustainable fisheries and aquaculture; 5. Skills development and circulation; 6. Maritime safety and the fight against marine pollution. For more information, please visit the [WestMED website](#).
- **BlueMed initiative:** BLUEMED is a Coordination & Support Action funded by the European Commission within the H2020 framework programme. It aims to support research and innovation for blue jobs and growth in the Mediterranean area. The BlueMed [Strategic Research and Innovation Agenda](#) (SRIA) outlines a set of key challenges for the Mediterranean and particularly knowledge gaps, specific activities enabling the blue growth as well as measures for capacity creation and skills’ enhancement. Sectors of interest include ecosystems, climate change, biotechnologies, aquaculture, fisheries, tourism, shipbuilding, transportation, observing systems, data, off-shore platforms, cultural heritage, spatial planning. Among the most relevant projects supported by BlueMed are the [pilot initiative for a healthy, plastic-free Mediterranean Sea](#) and [Start-up Actions](#). For more information, please visit the [BlueMed](#) website.
- **“Partnership for Research and Innovation in the Mediterranean Area” (PRIMA) Programme:** PRIMA is an article 185 (TFEU) initiative supported and funded under Horizon 2020, the European

Union's Framework Programme for Research and Innovation. PRIMA aims to support new R&I approaches to improve water availability and sustainable agriculture production through Integrated and sustainable management of water for arid and semi-arid Mediterranean areas; Sustainable farming systems under Mediterranean environmental constraints; Sustainable Mediterranean agro-food value chain for regional and local development. To date 19 countries have adhered to PRIMA: Algeria, Croatia, Cyprus, Egypt, France, Germany, Greece, Israel, Italy, Jordan, Lebanon, Luxembourg, Malta, Morocco, Portugal, Slovenia, Spain, Tunisia and Turkey. The projects funded so far by PRIMA are available here: call [2018](#); calls 2019 – [section 1](#); [section 2](#). For more information, please visit the [PRIMA website](#).

Finally, Applicants may consider initiatives, programmes and projects not comprised in the list as far as they are able to demonstrate the high potential of synergies with ENPI/ENI CBC Med projects, including for instance:

- **Donors** (United Nations and related agencies, national development agencies, international NGOs) and financing institutions (World Bank, European Investment Bank, European Bank for Reconstruction and Development, KfW Group, etc.) active in the Mediterranean Partner Countries participating in the Programme;
- **Regional cooperation** with Mediterranean Partners Countries implemented under the European Neighbourhood Instrument. The full list of programmes is available [here](#);
- **Bilateral projects** carried out in the Mediterranean Partner Countries participating in the Programme. For more information on the funded projects, please visit the websites of the relevant EU delegations: [Algeria](#), [Egypt](#), [Tunisia](#), [Israel](#), [Jordan](#), [Lebanon](#), [Palestine](#).

In the application form, Applicants are requested to indicate the projects they intend to capitalize on (according to the Programme priority chosen) and the outputs, results, expected achievements or knowledge (as the case may be) they intend to further develop, consolidate, disseminate and mainstream.

Please note that the list of projects below and further detailed in Annexes 1,2, 3 and 4 shall be considered as a mandatory reference basis by applicants. Other initiatives mentioned above (Interreg programmes with a Mediterranean coverage, WestMED and BlueMed, PRIMA, regional and bilateral cooperation under the European Neighbourhood Instrument, etc.) can also be considered. In any case and depending on the Priority chosen, it is highly recommended to applicants to capitalize on different relevant projects, **systematically including ENPI/ENI CBC Med projects (at least one)** when designing a proposal.

5.1 Business and SMEs development (thematic objective A.1)

5.1.1 Start-ups and recently established enterprises (priority A.1.1)

ENPI CBC Med projects

[Mobilising economic diasporas for Mediterranean development](#) (MEDGENERATION)
