A_A.3.1_0329	RESMYLE - Repenser emploi et insertion sociale des jeunes méditerranéens à travers le développement durable	Coopérative d'Activité et d'Emploi Petra Patrimonia - CDEPP - France	36	€ 2.198.639,84	€ 1.978.775,85	€ 219.863,98	ITA FRA LBN TUN JOR	PP1 - Société Coopérative Consortium de formation au travail et de coopération PP2 - AMESCI PP3 - Union Association pour la Participation et l'Action Régionale - Centre Méditerranéen de l'Environnement (Union APARE-CME) PP4 - Association pour le Développement Rural PP5 - Association pour l'Education Relative à l'Environnement de Hammamet PP6 - Jeune Chambre Economique de Tunisie PP7 - Institut Supérieur des Sciences et Technologies de l'Environnement de Borj Cédria PP8 - Université Jordanienne des Sciences et Technologies	Le projet RESMYLE se fonde sur deux constats simultanés : 1. Les difficultés d'intégration professionnelle des jeunes en Méditerranée, en particulier pour les NEETS, s'accroissent. Ces difficultés viennent à la fois des faiblesses des opérateurs chargés de l'insertion sociale, d'une inadaptation partielle de la formation aux besoins du marché de l'emploi, d'un repérage/accompagnement insuffisant des initiatives des jeunes pouvant aboutir à la création d'activités. 2. Pourtant, les défis de la protection de l'environnement en Méditerranée font émerger au niveau des territoires méditerranéens de nombreux besoins nouveaux largement insatisfaits à l'heure actuelle notamment faute d'une mobilisation suffisante des compétences : entretien de l'espace, tri des déchets, éco-mobilité, prévention des risques, etc. Pour répondre durablement à ce double constat, RESMYLE mobilise 9 opérateurs méditerranéens (coopératives, associations, universités) dans 5 pays (Fr, It, Jord, Lib, Tn) autour de 3 axes d'intervention complémentaires : 1. Offrir aux organismes d'insertion des NEETS en Méditerranée (associations, centres sociaux) les moyens de mieux prendre en compte le développement durable dans leurs actions— Outputs : Un centre de ressources et un parcours interculturel de formation d'éducateurs et d'animateurs sociaux ; 2. Tester un réseau de formations pratiques de terrain pour les jeunes. Centrées sur le développement durable, construites autour de la mobilité, de l'interculturalité et de la confrontation concrètes à des problématiques environnementales sur des territoires méditerranéens, les 16 formations testées auprès de plus de 200 jeunes constitueront un catalogue de 32 semaines de formation pratiques pour les NEETS ; 3. Créer un réseau méditerranéen d'éco-incubateurs d'activités portées par les jeunes fondés sur une méthode commune et des offres de tutorat/formation mutualisées. Output : 6 incubateurs, 15 formations de jeunes créateurs, 60 projets de jeunes accompagnés
A_A.3.1_0175	InnovAgroWoMed - Social Innovation in the Agri-food sector for Women's Empowerment in the Mediterranean sea basin	University of Rome Tor Vergata	36	€ 3.341.098,21	€ 2.469.217,44	€ 434.342,77	ITA ESP TUN PSE	PP1- CESIE PP2 - Young people towards solidarity and development PP3 - Center of Arab Women for Training and Research PP4 - Palestinian Businesswomen Association- Asala PP5 - Palestinian Ministry of Women Affairs	The proposal aims at boosting women labor participation and entrepreneurship, especially for those in the NEET segment, by leveraging on the potential of the agri-food sector - an industry closely resonating with the cultural identity of the Mediterranean Basin, and showing a significant level of untapped potential in terms of innovation and growth in the Mediterranean. This project will focus on two European regions (Valencia, Spain and Sicily, Italy) and two MENA areas (Beja and Medenin in Tunisia, and Palestine), identified as suitable for the implementation and scaling up of a sustainable value model in agri-food: Rural Social Innovation (RSI). RSI redefines the boundaries between organizations and the community, addressing broader societal challenges by seeking economic, social and environmental sustainability; balancing tradition and innovation; and explicitly seeking community development at the local level. This entails tailored research, training and placement activities that will establish the core of the project: 35 women per country (140 in total) will be trained with marketable skills to improve their capacity according to the RSI model. 80% of the 140 women will find a job after the end of the training (28 per country) as the output of subsequent job matching and job creation activitie
A_A.3.1_0155	HELIOS - enHancing thE social Inclusion Of neets	ASSOCIAZIONE ARCES	36	€ 2.791.438,03	€ 2.512.294,22	€ 279.143,80	ITA ESP GRC TUN PSE JOR	PP1 - Fisheries and Blue Growth District - COSVAP PP2 - Catalonia Delegation PP3 - Institute of Entrepreneurship Development PP4 - TUNISIAN UNION OF AGRICULTURE AND FISHERY PP5 - University College of Applied Sciences Planning and External Relations Affairs PP6 - The National Center for Agricultural Research and Extension	This project provides a fresh strategy for implementing measures to mitigate the high levels of NEETs in any given badly affected area. The system proposed here starts with a preliminary needs analysis of local economy requirements together with identification of the main NEETs subgroups and determination of best methods to reach and engage NEETs. In order to pilot the Helios project actions and innovative approach, the Blue and Circular Economy (BaCE) has been identified as the chosen economic sector with greatest potential for regenerative economic growth. The main outputs will be: - a fresh approach to engaging vulnerable young people and women through social media tools; - curricula for innovative targeted and tailored skills training courses oriented towards specific needs of the BaCE labour market and the needs of NEETs, based on direct interaction with local enterprise and NEET profiling; - soft skills coaching and mentoring actions and the creation of e-learning tools and methodologies supported by new technologies to facilitate skills learning and to monitor success and access to the labour market. The project will use the actions piloted during its lifetime and partner experience to create a methodology e- tool to be cascaded down to other towns in the programme area with similar high NEET rates. The main beneficiaries will be NEETs/women, MSMEs, TVETs and LAs who will subsequently have access to the BaCE materials developed, new methodologies and capacity building gained during the project.

A_A.3.2_0265	MedTOWN - Co-producing social policies with SSE actors to fight poverty, inequality and social exclusion	Asamblea de Cooperación por la Paz	36	€ 3.451.268,00	€ 2.985.346,82	€ 465.921,18	ESP GRC JOR TUN PRT PSE	PP1 - Tier 1 Technology SL PP2 - SCIENTIFIC SOCIETY FOR SOCIAL COHESION AND DEVELOPMENT PP3 - Agricultural Development Association PP4 - The Jordanian Hashemite Fund for Human Development PP5 - Association of Tunisian Women for reseach on development PP6 - Equality Portfolio - Department of Social Services PP7 - Palestinian Hydrology Group for Water and Environmental Resources Development PP8 - General Directorate of Cooperation. Regional Ministry of Social Services and Cooperation	MedTOWN is an initiative focused on the combined potential of agents of the social and solidarity economy (SSE), citizenship and local authorities to co-produce the social policies that can fight poverty, inequality, social exclusion and environmental unsustainability in the riparian countries of the Mediterranean basin, providing them with tools and connections to help them build local resilience and foster their transition towards becoming more fair, resilient and sustainable societies in the Euro-Mediterranean region. The initiative is based on Action Research to support the design of effective public policies on the provision of social services. To that effect a series of experimental actions deploying a co-production model will be undertaken and will serve both as effective modalities to increase the effectiveness of social services delivery during the project and as test-monitoring of results for policy design. The research and analysis will be carried out in-country and regionalized through a Regional Community of Practices and a Regional Research Group who will elaborate studies, papers, seminars, workshops and policy recommendations. A tailored communication strategy will be co-designed with the actors involved both in-country, EU and at regional level, for awareness raising and dissemination.
A_A.3.2_0286	MoreThanAJob - Reinforcing social and solidarity economy for the unemployed, uneducated and refugees	An-Najah National University - Palestine	36	€ 2.051.597,00	€ 1.846.437,30	€ 205.159,70	PSE JOR LBN ITA GRC	PP1 - Nablus chamber of commerce and industry PP2 - Ministry of Public Works & Housing PP3 - Mutah University PP4 - Business Consultancy and Training Services PP5 - CESIE PP6 - EUROTRAINING EDUCATIONAL ORGANIZATION SA	MoreThanAJob will promote economic & social development by facilitating the inclusion in the employment & educational system of some of the most vulnerable population groups. It will deliver and demonstrate a framework of best practices for inclusion of the unemployed (including refugees & uneducated) in the work & education system. The framework is based on the collaboration of SSE actors and public authorities for delivering more effectively their services. Selected SSE actors will also be directly supported through sub-grants. The SSE actors & public institutions will be trained in the application of the framework. Pilot sub-projects applying the framework will also take place. By assisting the target population in entering the economy, we foresee at least 500 new full-time contracts. To make an impact in the long-term, train-the-trainer seminars have been planned, as well as policy recommendations. In the long-term, by applying the framework, we foresee at least 1000 new jobs in each of the target countries yearly. Long-term impact is also expected in the SSE actors’ ecosystem (at least 100 new positions per year in each country).
A_A.3.2_0376	TEC-MED - Development of a Transcultural social-ethical-care model for dependent population in Mediterra basin	University of Seville	36	€ 3.331.225,33	€ 2.998.102,80	€ 333.122,53	ESP ITA GRC TUN LBN EGY	PP1 - R&D Division PP2 - New Society Social Cooperative PP3 - Societe Anonyme of Research, Innovation and Development of Telematics Technology – VIDA VO S.A PP4 - THERAPEUTIC EDUCATIONAL CENTRE OF PATRAS FOR PEOPLE WITH INTELLECTUAL DISABILITIES PP5 - National Institute of Nutrition and Food Technology – Studies and Planning Department PP6 - DQS Lebanon PP7 - Institute for Development, Research, Advocacy & Applied Care PP8 - Academy of Scientific Research and Technology PP9 - SEKEM Development Foundation	Ageing population is a phenomenon due to decrease in fertility, mortality rates and migration trends. Currently some MED countries (e.g. Europe) are advanced in the ageing transition, while in other countries (e.g. North Africa and the Middle East) the process is underway with an acceleration due to the migration phenomena of younger generations. Anyhow all MED countries are showing common pattern of both social support decrease and the need for innovative and sustainable socio-ethical-care models. These issues impact on many categories of vulnearable people, including the target of TEC-MED project, such as dependent elderly having chronic diseases and lacking of family network support highly impacted by the lack of both policy priorities and new models of welfare systems, with the consequence of being further marginalized. The main outcome of the project is an innovative and cost-effective socio-ethical care intervention framework including: (1) a social-care organizational model comprising: the governance model; the organization structure; the skills profiles for the social care personnels. Beneficiaries are: Public administrations (Associates) (2) a software solution enabling social-care organizational model, including specifications for its localization and deployment in reference countries. Beneficiaries are: Social care actors of NGOs and Public administrations (Associates) (3) an agreed selection of elderly care monitoring indicators to assess the performance of TEC-MED service delivery process against the principles and praxis of the reference framework (4) a structured data-set for a more rigorous cross-country analysis of elderly management policies and impacts in quality of life (5) a set of strategic guidelines aiming at improving and adapting of social care policies to be implemented in cooperation with public administrations in MED countries The outputs will be tested in the six cross-border areas and on different care professionals and organizations
