

Call for tender

Organization Earth, SIRCLES project's partner in Greece, is launching a tender for the acquisition of 24 composters appropriate for food and green waste composting.

The deadline to submit your proposals is March 21, 2022.

All quotes provided should meet the specifications listed in the link.

For more information please contact: alexis@organizationearth.org

Specifications:

1. The body of the composters must be made of recycled plastic. The recycled plastic of the body must have a guarantee of at least 12 years.
2. The lid of the composters must be made of recycled plastic. The recycled plastic of the body must have at least a 3-year guarantee against manufacturing defects.
3. The composter must have appropriate design which enables their placement in isles either of 10 or 4.
4. The transfer of the composting mixture from one composter to the next must be performed without the need for special tools.
5. The lid must have two opening angles: 50° and 90°.
6. All the walls of the composter must be easily dismantled without tools.
7. The composters must have special design to prevent rainwater accumulation on their surface.
8. The composters must have special design to prevent the insertion of rodents.
9. The design of the composters must ensure that there is no need for concrete lattice under the composter for their installation.
10. The composters must have special design to prevent the accumulation of water under the lid due to condensation of water vapors.
11. The manufacturing company must have a long experience in manufacturing of composters.
