

Mediterranean Dialogue for Waste Management Governance

Med4Waste targeted Mentoring Schemes for Southern Mediterranean municipalities

Start date: 1st October 2021 | End date: 30th November 2023

Speaker: Noé Viedma

Entity: MedCities

Date: 25 - 10 - 2023

Location: Cagliari, Italy

MedCities, the mediterranean cities network

- Network that gathers 73 local authorities from all the shores of the Mediterranean basin.
- Local authorities located in Mediterranean coastal states plus Portugal and Jordan, that carry out or promote activities aligned with the objectives of the network.

Our guiding principles

Sustainable development

Climate crisis mitigation

Economic and social equality

Our main working fields

Strategic planning

Environment & Biodiversity

Social cohesion

Economic & sustainable development

Sustainable Urban Services

A platform for innovative projects

Reinforcing the role, competences and resources of Mediterranean local governments through capacity-building projects.

A regional cooperation actor

Launching and developing direct cooperation projects and partnerships between members.

A knowledge sharing platform

Sharing best practices AND mistakes on sustainable local policies between Mediterranean actors. Raising awareness and common responsibility on sustainable development.

A voice for Mediterranean local authorities

Advocating and representing Mediterranean local authorities in international debates. Promoting citizen participation in local projects.

WHAT IS MED4WASTE MENTORING SCHEME?

A program that provides **guidance and technical support to six municipalities from Lebanon (2), Jordan (2) and Tunisia (2)** to improve their waste management systems.

Main activities:

1. Improve or develop their **Integrated Municipal Waste Management (IMWM)** plan [13.000 €]
2. Implement a **tailor-made supporting action** aligned with their IMWM plan [5.000 €].
3. **Twining and exchange program** with a city from another ENI project that has implemented a solution to enhance their waste management system [3.000 €]
4. Social entrepreneurship programme **for 2 local SMEs and Start-ups**: Development of a social value-based waste solution that can respond to the local challenges previously identified [10.000 €].

TOTAL: 31.000 EUR

SELECTED MUNICIPALITIES

Municipality	IMWP	Supporting action	Twining	Replicable result
Byrain Jordan	Elaboration	Study on the waste management pricing system applied to the commercial sector	CLIMA Sestri Levante (IT)	Pay as you throw tax and related advocacy
